## eDISCOVERY

**Leading eDiscovery specialists, providing comprehensive solutions to support litigation, dispute resolution and investigative matters**

### **Why work with us?**

For more than 15 years the CYFOR name has represented a rigorous technical approach to the eDiscovery process, as well as a practical understanding of the ever-changing demands of commercial litigation.

Our ability to combine advanced forensic techniques and eDiscovery workflows provides a leading edge, with a proven capability from extraction through to production.

This expertise allows for the successful completion of regular instructions on highly contentious, multi-lingual and multi-jurisdictional matters, with tight court deadlines.

# Combining dynamic eDiscovery solutions with Digital Forensics expertise

## Fixed Quoting Structure

CYFOR understand that producing information for review and analysis in response to disclosure requirements can be consuming and expensive. With over a decade of experience in eDiscovery we know it's essential to have a handle on costs.

That is why we provide transparent, concise and easy to digest fixed price quotations. This not only helps your clients predict costs but also enables the eDiscovery process to be applied to smaller cases on an investigatory basis.

## eDiscovery Technology

Strong partnerships and full certification with 'best of breed' eDiscovery software vendors such as Relativity and Nuix, enables CYFOR to provide a full suite of services for the disclosure of electronically stored information (ESI). This full spectrum of review platforms allows for vast amounts of data to be processed and disseminated in the most complex of investigations.

Relativity is an advanced online review platform, incorporating advanced analytics technology, which improves review speed, organise data by concepts, and can quickly identify key issues. **Key features;**

- **Visual analytics**
- **Predictive coding**
- **Email threading**
- **Data clustering**

As an eDiscovery solution, Nuix's exceptional power enables CYFOR to process and search vast quantities of data, from collection through to production within the most complex investigations. **Key features;**

- **Processing power**
- **Remote email downloads**
- **Data management**
- **Data exporting**

## Secure Infrastructure

We understand the importance of security in both our corporate practices and in the work undertaken for clients. That is why our extensive infrastructure is ISO 27001 accredited, the internationally recognised framework for best practices in Information Security.

This allows for the scalability of our eDiscovery service within complex investigations. Providing you with a proportionate, defensible and repeatable solution, as well as the tools and managed services to ensure your requirements are met.

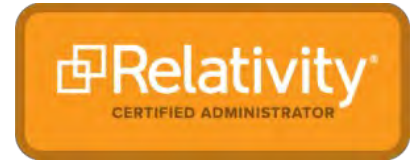

## People

Individually, CYFOR's Digital Forensic and eDiscovery personnel are recognised as some of the industry's leading specialists. We take great pride in our eDiscovery team, who are Relativity Certified Administrators and experts in Relativity Analytics & Technology Assisted Review. As a collective, their combined expertise becomes even more powerful for the most complex of cases, while going above and beyond to exceed client expectations.

## eDiscovery Services

- ☑ Complimentary consultations
- ☑ Fixed price quotations
- ☑ EDQ consultancy
- ☑ Forensic data collection
- ☑ De-duplication & keyword consultancy
- ☑ Early Case Assessment
- ☑ Online document review
- ☑ Secure data hosting
- ☑ Search & analysis
- ☑ Print, export & production
- ☑ Audio data management

# eDiscovery Team | Key Contacts

**Danielle Neil**  
eDiscovery Manager

Danielle holds a First Class Honours in Forensic Computing (BSc Hons) and has over seven years' industry experience. Her career started within Cheshire Constabulary's Hi-Tech Crime Unit, which allowed her to maximise her digital forensics skills. As an eDiscovery professional she is more than competent in maximising a range of powerful review platforms and successfully leads CYFOR's eDiscovery team, applying her expertise to numerous investigations.

**Luke Holden**  
eDiscovery Specialist

As an eDiscovery specialist, Luke is fully experienced in utilising advanced analytical software, such as Relativity and Nuix. With over five years' experience and a First Class Honours in Computer Forensics (BSc), he possesses exceptional digital forensic skills, which complement his eDiscovery background. As such, he is frequently called upon as an expert witness to present evidence in court, which has included The Royal Court of Justice.

**Paula Forrest**  
eDiscovery Specialist

With a comprehensive skillset in advanced eDiscovery software, Paula specialises in social media investigations, with a degree in BA (Hons) Criminology & Sociology, and a Masters qualification in Forensic Document Analysis. Her role as an Intelligence Analyst within the Cheshire Constabulary earned her a Chief Constable's Commendation, and two Chief Superintendent's Commendations, for exceptional analytic skills within high profile cases.

**Talha Ali**  
eDiscovery Specialist

Bond Solon expert witness trained, Talha has presented evidence in court within many dispute resolution and litigation matters. Possessing a First Class Honours in Forensic Computing, Talha's digital forensic knowledge, combined with his proficient knowledge of eDiscovery disciplines, allow him to approach investigative matters with a thoroughly professional understanding.

For more information on our eDiscovery services, please contact:

**Lawrie Hall** | +44 (0) 207 438 2045 | [lawrie.hall@cyfor.co.uk](mailto:lawrie.hall@cyfor.co.uk)  
Associate Director

Lawrie is responsible for all eDiscovery operations within the business and leads CYFOR's eDiscovery and Digital Forensic professionals. Extensive project management and consultancy on a vast range of high profile and complex electronic disclosure investigations has positioned Lawrie as an expert within eDiscovery. Advanced technical proficiency across online review platforms combined with his industry experience, allows Lawrie to provide exceptional advice within the most complex litigation matters.

**Amy Finer LLB (Hons)** | +44 (0) 207 438 2045 | [amy.finer@cyfor.co.uk](mailto:amy.finer@cyfor.co.uk)  
Senior Case Manager

As a law graduate, Amy has a thoroughly professional understanding of the critical elements within each stage of the eDiscovery process, as well as how best to advise her client's on the challenges and obligations faced in terms of disclosure. This has allowed her to adopt a more consultative approach to the numerous, complex and multi-jurisdictional projects she undertakes. Working closely with CYFOR's investigation teams, she can also effectively advise on how investigatory forensics can strengthen legal cases.

“We have worked with CYFOR, often in a high pressure situation, and have always been impressed by their professionalism. The standard of their investigative work and their knowledge of computer forensics is excellent. I would have no hesitation in recommending them to others.”

#### **Mishcon de Reya LLP**

“The CYFOR eDiscovery team were extremely responsive in data preservation, ensuring that our client’s business continuity was not interrupted and completing the collection efficiently. The data was processed and presented to us in an intuitive online review platform, which allowed the Evershed’s case team and our client to quickly identify and tag responsive documents in less than half the time of manual review. Both Eversheds and our client were extremely impressed by the professionalism of CYFOR. The efficiency and cost savings made ensured that the case was completed on time and to budget.”

#### **Eversheds LLP**

“CYFOR recently assisted in helping to retrieve business sensitive information. CYFOR were professional, reliable and got the work done despite a number of changes to the scope and deadline. I was particularly pleased with the responsiveness of the Head Case Manager and the eDiscovery Specialist, as both provided an excellent service. I will use CYFOR again in the future and would recommend their digital recovery services without hesitation.”
