CYBER SECURITY

Cyber Security has been at the core of CYFOR's services since inception. We understand that almost every business relies on the confidentiality, integrity and availability of its data.

Why CYFOR?

CYFOR supports an organisation's cyber security strategy, by establishing risks and putting protocols in place to improve practices and raise awareness of cyber security.

Our information security specialists are qualified with vast experience in digital forensics and they understand the complexities of protecting an organisation's electronic data. When this is combined with an established cyber security strategy, you can be sure that your company's digital assets and data are safeguarded.

Cyber-attacks have grown by more than 80% in the last two years... **Secure your organisation from criminals**

Cyber Secure

Whilst the accessibility and connectivity of the digital economy provides huge opportunities, it can create new risks. Lack of security awareness can result in organisations being exploited.

With the prevalence and growth of cyber threats, it is critical to defend your organisations data. Identifying and responding to cyber security vulnerabilities before cyber criminals can identify and exploit them should be paramount.

CYFOR provides a range of services designed to expose potential weaknesses and security threats that could be exploited, allowing you to apply remediation measures thus reducing the possibility of;

- **Data breaches – including intellectual property & data theft**
- **Reputational damage**
- **Investigations & regulatory fines (GDPR - May 2018)**
- **Extensive loss of business revenue**

Incident Response

If a potential misconduct or attack should be discovered or suspected within your organisation, it is critical that rapid remediation techniques and forensically sound methodology are applied to avoid critical organisational damage.

Our experienced Incident Response team are available 24 hours a day to respond to nationwide incidents, with the aim of neutralising threats and quickly getting you back to operational effectiveness.

CYFOR's proven methodology to each incident:

Lock-down

Perform the actions necessary to prevent further damage to the organisation and mitigate business risk.

Preserve Evidence

Forensically capture data on compromised or affected systems.

Investigate Incident

Use forensic and information security tools to determine source of attack and attempt to identify the perpetrators.

Management Report

Provide a full log of the investigation undertaken and the results of this investigation.

How we can help...

Many security threats can be avoided by implementing a Cyber Security Audit and response plan across your organisations IT assets. CYFOR has extensive experience providing IT security services to companies across a full spectrum of industries.

The Cyber Security Audit is a comprehensive Gap Analysis and Vulnerability Assessment of your organisations infrastructure, which is divided into two distinct phases;

Phase 1 | Cyber Security Audit

- Recommendation and remediation action points
- Breach response plan
- Staff training
- Detailed report including strategy overview
- Cyber resilience assessment
- Vulnerability identification

Phase 2 | Vulnerability Assessment

CYFOR's Vulnerability Assessment service assists in preventing network attacks by identifying the vulnerabilities and configuration issues that hackers use to penetrate your network.

- Vulnerability Scanning across company infrastructure
- Configuration and compliance checks
- Malware detection
- Web application scanning
- Data back-up review and analysis
