Corporate Investigations

- Data Theft
- Social Media Investigations
- Digital Forensic Investigations
- Employee Investigations

Are you concerned about an employee stealing company data? Worried that data has been stolen and provided to a competitor? Perhaps you suspect fraudulent activity within your organisation and require an internal investigation to acquire digital evidence. CYFOR have assisted organisations and reduced business risk with covert investigations since 2002.

Investigations Expertise

With industry leading experience in digital forensics and litigation support services, CYFOR's corporate investigation services provide the trusted expertise to reduce business risk. We have assisted a multitude of organisations, from law firms and regulatory authorities to corporate businesses, SMEs and private individuals.

Delivering professional, accurate and cost-effective investigations, we have supported clients across a full breadth of industries;

- Accountancy
- Banking & Finance
- Law & Regulatory
- Aerospace
- Pharmaceutical
- Education
- Agricultural
- Defence
- Private Clients
- Manufacturing
- Automotive
- Telecommunications
- Property & Real Estate
- IT & Technology
- HR & Recruitment
- Energy
- Engineering & Construction
- Government Agencies

Data Recovery

CYFOR understand how important your data is and the wider commercial implications of data loss, including the cost and disruption to a business. Using a forensically sound methodology, our team of highly qualified data recovery professionals operate on an international level. With unparalleled experience in the use of advanced digital forensic techniques, our experts can extract and preserve data from all types of devices, including;

- Computers and mobile phones
- Servers, hard drives and back-up tapes
- USB memory sticks and SD cards
- Solid state disks (SSD), HDD and RAID devices

Intellectual Property & Data Theft

Data theft has been a long-standing issue for businesses and subsequent employers, especially as the business landscape becomes ever more digitised. We are frequently instructed by clients who have had company data stolen by current or former employees, who leave to work for a competitor, or set up their own company.

We provide investigations in cases ranging from intellectual property theft, partnership and contract disputes, to social media issues. Our extensive capabilities allow us to forensically investigate computers, mobile phones, hard drives and other devices within strict time frames to meet your specific requirements.

Our specialists gather intelligence and digital evidence on the specific data that may have been stolen, and by what method, leading up to an employee leaving an organisation.

Social Media Investigations

Whether you're an employer who needs to do background checks on a new employee's social media accounts, or a company director who needs information identifying on a mobile phone, CYFOR's social media analysts can retrieve the information you require.

Using the advanced analytics software and open source intelligence gathering, CYFOR's Intelligence Analysts can search, identify and monitor the following;

- Social media posts
- Photographs/pictures
- Direct messages & group conversations
- Message IP addresses
- Data mapping & profiling
- Social media usage of staff during working hours
- Employee background checks

- Subject Access Requests
- Freedom of Information Requests
- Data Recovery & Preservation
- IT Security Consultancy

Digital Forensic Investigations

We provide an extensive range of digital forensic services for all circumstances, with suspected fraudulent and malicious activity warranting immediate attention. The rapid preservation of digital evidence is critical to avoid a situation that could spiral out of control, causing irreparable damage to your personal or organisational intellectual property. CYFOR's digital forensic investigations team have experience in assisting clients in the following situations;

- Investigation into any type of computer misuse
- Corruption and bribery investigations
- Regulatory investigations
- Investigations linked to contentious insolvency matters
- Background checks and desktop reviews
- Fraudulent vendor invoices and emails
- Employee misconduct
- Mismanagement and theft of intellectual property
- Malicious software

CYFOR Business Packages

Have you lost an employee to a competitor? Is client data or bespoke intellectual property key to your business? Are traditional pre-employment checks not thorough enough?

CYFOR offer fully customisable business packages that cover a variety of circumstances and are tailored to your departmental or business requirements. Our industry-leading expertise in both eDiscovery and Digital Forensics, blended with our advanced Cyber Security capabilities, provide complete business data protection. We offer both responsive, one-off solutions and monthly retained services to safeguard your business against common business risks.

CYFOR Guarantee

- All forensically collected data is stored on our dedicated servers, hosted in our secure facility with no external access.
- All findings are documented in a formal report, suitable for use in court and backed up by our forensically sound workflows.
- All services are available individually or part of bespoke packages entirely configurable by you.

Services include:

- A detailed, meticulous workflow to secure company data when an employee leaves the business.
- Analysis of user accounts for activity in the month leading up to notice date, including; USB/hard-drive analysis, Internet use investigation, analysis of email activity, and search and recovery of deleted data.
- Comprehensive forensic imaging and analysis of computers/mobiles at regular intervals.
- Ring-fenced, physical storage of ex-employee data for up to 6 months, until you can be sure that risk is averted.
