

## Digital Forensics

Supporting legally aided investigations, with industry leading Digital Forensics expertise since 2002

### **About us**

Recognised as industry experts, Digital Forensics has been at the core of CYFOR's service offering since inception. With a comprehensive range of forensic services and a proven capability, we are instructed on a vast range of cases.

We have the expertise to recover, analyse and present digital evidence from multiple forms of media held within the UK and internationally.

With over 15 years of expertise, we are in the position of having experience working for both the defence and prosecution. This allows a perspective into the challenges and goals faced by each party and therefore how best to work in the interests of our clients.

Our team of specialist criminal case managers are acutely aware of the sensitivity and time critical nature of instructions. That is why we operate a 24 hour turnaround on quotations, while informing clients of developments at each stage of the case.

# Instruct The Digital Forensic Professionals

---

## Specialists

Individually, CYFOR's highly qualified digital forensic specialists are recognised as some of the industry's leading specialists. As a collective, their combined expertise becomes even more powerful for the most complex of cases, while going above and beyond to exceed client expectations. They utilise the latest technology and digital forensic techniques to discover all potential evidence within a wide range of corporate investigations.

Our forensic investigators are all approved Expert Witnesses and courtroom trained. Strict adherence to the ACPO Guidelines and thorough forensic protocols, ensures comprehensive reporting, often concluding with expert evidence presented in court.

## Technology

Digital forensics platforms are powerful and indispensable tools within any investigation and we understand the requirement to be at the cutting edge of this technology.

That is why we have strong partnerships and full certification with leading technology providers, while continually investing in our technical infrastructure and forensic software to enhance our service offering.

## Forensic Data Collection

We appreciate the critical nature of imaging computers and associated media, especially in cases where further investigation or disclosure may be required. Capturing this data using forensically sound methodology is vital if the integrity of any subsequent investigation is to be maintained. Our team operates globally, often travelling at short notice to ensure that a complete set of onsite data is recovered.

---

## Accreditations

Our accredited secure infrastructure pays testament to industry recognised standards in providing the highest level of service and security to all our clients.

**Cyber Essentials Plus**

Government and industry standard to provide clear controls that are implemented to mitigate the risk from cyber threats, while also demonstrating to stakeholders that essential security precautions have been undertaken.

**ISO 27001**

Internationally recognised framework for best practice in Information Security Management Systems (ISMS) and covers best security practises to manage data integrity, confidentiality and minimising IT security risks.

**ISO 9001**

A best practice management framework. The attainment of ISO 9001 is our dedication to providing the highest level of customer service and compliance for continued business improvement across all levels.

## Investigations

CYFOR have been instructed on a vast range of digital forensic investigations, covering a full spectrum of criminal matters. We are no strangers to completing numerous high profile cases, which have been featured by the media and have also completed investigations across different continents.

- **Fraud**
- **Assault**
- **Terrorism**
- **Murder**
- **Indecent imagery**
- **Burglary**
- **Drugs**
- **Firearms**

## Secure Infrastructure

The importance of security in both our corporate practices and in the work undertaken for clients, is something we view with great importance. That's why our secure infrastructure is ISO 27001 accredited and has been independently inspected and verified by The Metropolitan Police.

- **Secure onsite evidence & data storage**
- **NPPV Level 3 security cleared personnel**
- **ISO 9001 & ISO 27001 accredited**
- **24hr CCTV and NACOSS alarm monitoring system**
- **Security cleared ex-law enforcement couriers**
