

eDISCOVERY | DIGITAL FORENSICS | CYBER SECURITY

# Corporate Investigations

Securing confidential data within organisations and assisting internal investigations, with a range of leading digital forensics expertise.

## About us

Operating globally, CYFOR is a leading eDiscovery, Digital Forensics and Cyber Security provider. We have over a decade of experience in supporting companies of all sizes and industries, with specialist investigation techniques, while ensuring their IT security is of the highest level.

Our expertise ranges from internal investigations to ascertain what data may have been taken by a former employee, to ensuring confidential information is kept secure.

Whether you are worried about brand reputation, financial loss or a potential cyber-attack, our long-standing experience has allowed us to have a fundamental understanding of core legal processes as well as the management of evidence. These are enforced by our Cyber Essentials Plus, ISO 9001 and ISO 27001 accreditations.

# Assisting a multitude of organisations, from small bespoke firms to large PLCs, in securing their data and IT assets

---

## Specialists

Individually, CYFOR's highly qualified Digital Forensic specialists are recognised as some of the industry's leading specialists. As a collective, their combined expertise becomes even more powerful for the most complex of cases, while going above and beyond to exceed client expectations.

Many investigations are undertaken through support and instruction of senior management, to ascertain evidence in the most strategic and cost effective manner.

Our digital forensic investigators are all approved Expert Witnesses and courtroom trained. They utilise the latest technology and digital forensic techniques to discover all potential evidence within a wide range of corporate investigations.

## Forensic Data Collection

We appreciate the critical nature of imaging computers and associated media, especially in cases where further investigation or disclosure may be required. Capturing this data using forensically sound methodology is vital if the integrity of any subsequent investigation is to be maintained. Our team operates globally, often travelling at short notice to ensure that a complete set of onsite data is recovered.

## Technology

Digital forensic platforms are powerful and indispensable tools within any investigation and we understand the requirement to be at the cutting edge of this technology. That is why we have strong partnerships and full certification with leading technology providers, while continually investing in our technical infrastructure and forensic software platforms to enhance our service offering.

## Employee leavers packages

We understand the importance of protecting the integrity of your organisation's data across all departments. That is why we offer a unique range of bespoke computer and mobile forensic packages, designed to facilitate your requirements and provide added reassurance in the event of an employee leaving unexpectedly, either to a competitor, resignation or dismissal.

Bespoke packages include;

- Forensic image (copy) and analysis of computer data
- Forensic image of mobile phones for preservation or analysis.
- Extraction of entire mailboxes for presentation or analysis.
- Analysis of user-accounts for activity in the month leading up to notice date, including;
  - USB activity analysis
  - Internet history investigation (Dropbox, web based emails)
  - Analysis of email activity
  - Search and recover deleted data
  - Bulk printing activity analysis
  - Keyword search
- Report of findings (suitable for use in court).
- Upload collected data onto advanced online review platform for search and analysis. This is useful for compliance and audits of mailbox usage and content.

## Accreditations & Infrastructure

Our accreditations pay testament to industry recognised standards in providing the highest level of service and security to all our clients.

That's why our secure infrastructure is ISO 27001 accredited and has been independently vetted by The Metropolitan Police.

### Cyber Essentials Plus

Government and industry standard to provide clear controls that are implemented to mitigate the risk from cyber threats, while also demonstrating to stakeholders that essential security precautions have been undertaken.

### ISO 27001

Internationally recognised framework for best practice in Information Security Management Systems (ISMS) and covers best security practises to manage data integrity, confidentiality and minimising IT security risks.

### ISO 9001

A best practice management framework. The attainment of ISO 9001 is our dedication to providing the highest level of customer service, and compliance for continued business improvement across all levels.
